Summary

Full-stack and AI engineer with 2+ years of experience building scalable MERN applications, RESTful APIs, cloud-native platforms, and microservices. Skilled in React.js, Node.js, Docker, Kubernetes, DevOps, CI/CD, testing, API design, performance tuning, secure software development, and agile methodologies.

Experience

SDE Intern *PathMentor, Remote*

Jul 2026 – Present

Tech Stack: React Native, Expo Go, TypeScript, React, Supabase, Python

- Contributed as an early-stage engineering team member, developing and shipping mobile application features for the startup.
- Optimized network requests and API calls, improving application performance by **30%**; integrated Supabase for backend operations and APIs.
- Built a Python-based Telegram quiz bot and collaborated through Git/GitHub on feature development, bug fixes, and code reviews.

Projects

MindGraph - AI Knowledge Platform

Live GitHub

React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Pinecone, RAG, Generative AI

- Led end-to-end development of a MERN platform supporting PDFs, images and web links.
- Developed and documented RESTful APIs, OTP authentication, and browser extensions, reducing capture time by 60%.
- Implemented RAG pipelines and Pinecone semantic search with 70%+ retrieval relevance.

Buildex - AI-Powered Cloud Sandbox IDE

GitHub

React.js, Vite, Node.js, Express.js, Docker, Kubernetes, Socket.IO, Mistral AI, LangChain, LangGraph, MongoDB, Redis, RabbitMQ

- Architected cloud-deployed React sandboxes provisioned in under 60 seconds using Docker and Kubernetes.
- Built AI agents with Mistral, LangChain, and LangGraph to generate and modify 20+ files automatically.
- Implemented microservices, rate limiting, real-time terminals, and event-driven APIs using Redis and RabbitMQ.

Publications

IoT-Enabled Real-Time Pedestrian Safety System Using AI

Nov 2025

Published in *ICCCA 2025*, presenting an AI and IoT-based pedestrian safety framework for real-time accident prevention.

DOI: 10.1109/ICCCA66364.2025.11325702

Skills

Languages: JavaScript, TypeScript, Solidity, HTML5, CSS3, Python

Frontend: React.js, Next.js, Redux, Tailwind CSS, SCSS, GSAP

Backend & AI: Node.js, Express.js, Socket.IO, LangChain, LangGraph, REST APIs

Tools/Platforms: AWS, Docker, Kubernetes, MongoDB, Redis, Pinecone, RabbitMQ, Git, GitHub, CI/CD, Linux, Postman, Hardhat, VS Code, Antigravity, Claude, ChatGPT

Achievements

- Led a team of 3 members to win the **Best Pitch Award** and a cash prize at the Sheryians Startup Build Hackathon.
- Maintained a **600+ day GitHub streak** with **3,000+ contributions** and **50+ open-source repositories**.
- Ranked in the **top 10% among 1,500+ participants** during the Metacrafters Web3 developer program.
- Presented the paper *Anonymous Bullying Reporting System Using AI* at **ICNARI 2026, NIT Patna**, where it was accepted for publication.
- Moderated the **Sheryians X Community**, helping grow engagement and support onboarding for **1,000+ members**.

Education

Bachelor in Computer Science Engineering | Chandigarh University

Aug 2022 – May 2026

Mohali 140413, Punjab

CGPA: 7.89
